

## FIELD PRACTICES GUIDE SELF TEST

---

Test your knowledge of administrative and operational practices of the Managed Forest Program as it applies to your property. These are described in the Infolip document. The answers are on the last page of the test. Your score will point to topics that may need more review.

---

1. How much forest land should be converted to roads and logging trails?
  - a. 10m width
  - b. Only enough for safe and efficient access
  - c. 25m width
2. A minimum of how many commercial trees need to be retained adjacent to Class C streams?
  - a. 30
  - b. 25
  - c. 15
3. Within what time must you notify Council after discovering a slide or debris flow on your land, if it has deposited debris or sediment into a Class A, B, C, D or E stream?
  - a. 30 days
  - b. 48 hours
  - c. 24 hours
4. What is a key element of road right of way drainage?
  - a. Use v-shaped ditches
  - b. Widen the road to provide drainage
  - c. Maintain natural surface drainage patterns
5. What is the risk rating where the consequence level is high and the hazard level is low?
  - a. high
  - b. medium
  - c. low
6. Which of the following resource issues are not subject to regulation by the Private Managed Forest Land Council?
  - a. Fish habitat
  - b. Cut block size
  - c. Drinking water quality

7. Which of the following is not directly protected by riparian tree retention?
  - a. Stream nutrients
  - b. Tree health
  - c. Fish cover
8. Which of the following may be used as a road deactivation activity?
  - a. Upgrading culvert sizes
  - b. Road surface grading
  - c. Re-vegetating erodible soils
9. Which of the following is *not* a Council function?
  - a. Assessing or classifying land
  - b. Collecting administrative fees
  - c. Enforcing regulatory compliance
10. Reforestation of disturbed areas is required to achieve successfully regenerated stand status within:
  - a. 5 years
  - b. 10 years
  - c. 15 years
11. What is the stream classification of a 1m wide non-fish stream at a point where there is no licensed waterworks intake within 1000m?
  - a. Stream class A
  - b. Stream class E
  - c. NC
12. Which of the following would be the first step when harvesting near a licensed waterworks intake?
  - a. Avoid damaging retained trees
  - b. Restrict operations in adverse weather conditions
  - c. Notify holders of the licensed waterworks intake that harvesting is to be carried out
13. Within how many days after the transaction date of a sale of a managed forest property must you notify the Council office?
  - a. 30 days
  - b. 7 days
  - c. 90 days

## FIELD PRACTICES GUIDE SELF TEST

14. For harvesting adjacent to stream classes D and E, which of the following applies?
- Commercial trees are not required to be left along the stream
  - Understory vegetation may be removed within 10m of the stream
  - Non-commercial trees are not required to be left along the stream
15. When does an owner's regulatory obligation to maintain a road expire for a road constructed or used for harvesting?
- Five years after conclusion of harvesting
  - During unseasonal weather conditions
  - When the road has been deactivated

QUESTION #	ANSWER
1.	b
2.	c
3.	c
4.	c
5.	b
6.	b
7.	b
8.	c
9.	a
10.	c
11.	c
12.	c
13.	a
14.	a
15.	c
